

# PF2Suit

# Take control of your premium finance.

## PF2Suit – Personal Lines finance to suit your needs

PF2Suit is a Personal Lines finance package designed to maximise income, flexibility and control for the specialist Personal Lines broker. Our flexible finance and back office systems give you total control of your premium finance. We give you full access to i-prompt, our online trading system, together with software house integration and the paperless Telesign facility.

### All this at an unbeatable rate.

So what's special about PF2Suit? Using our award winning web based interface, you control all aspects of your customer relationships without the need for you or your clients to contact us. And as you'd expect, we've made the client set up as easy as possible, so all transactions can be paperless.

PF2Suit is provided by Close Premium Finance, the group that introduced premium finance to the insurance market in 1977. We continue to develop pioneering products and services to improve the way brokers do business.

## Benefits for you

**Finance at low, low rates** – our streamlined Bordereau Recourse product means we can pass even more income your way.

**Off-the shelf product** – product guides and full training provided for a fast and effortless set up.

**Total control** – our enhanced i-prompt system gives you access to the full loan processing function so you manage adjustments, refunds and cancellations. And you manage your customer services too.

**Single contact for all your needs** – one dedicated contact to handle all your enquiries so you receive a personalised service.

**Time saving features** – Telesign reduces your paperwork whilst software house integration eliminates double-keying, both saving you time and time is money.

**Better business planning** – our up-to-date management information is accessible via i-prompt at any time.

**No bad debt charges** – selecting the customers for financing means you already manage your own bad debt so why be charged for this?

No-one else is Close.
